Dr. Joshua Lederberg  
Department of Genetics  
University of Wisconsin  
Madison 6, Wisconsin

Dear Dr. Lederberg:

I regret to say that our stock of coliforms fermenting lactose at room temperature but not at 37° have been discarded. You should, however, have no trouble isolating such forms from soil that has been free from human habitation for some time, or from grains such as oats, wheats and so forth.

Very truly yours,

A handwritten signature in cursive script, appearing to read "C. A. Stuart".

C. A. Stuart
